TOXICOLOGY

SUBJECT INDEX

Volume 55 (1989)

Acrylamide, fertilization, implantation, reproduction, sperm, dominant lethal, 53
Aldosterone, cadmium, nephrotoxicity, distal tubule, non-invasive enzymatic marker, urinary kallikrein, renin, 117
Alkytin compounds, organotins, toxicity, contact dermatitis, bile duct injury, renal toxicity, thymus atrophy, 253
Anticancer drugs, cisplatin, carboplatin, mutagenicity, 183

B6C3F mice, gossypol, pharmacokinetic, Fischer 344 rats, male reproductive toxicity, male infertility, male contraceptive agent, 37
BAP-7,8-diol, benzo[*a*]pyrene, metabolic activation, S9, complex mixtures, 93
Benzo[*a*]pyrene, metabolic activation, S9, BAP-7,8-diol, complex mixtures, 93
Bile duct injury, alkytin compounds, organotins, toxicity, contact dermatitis, renal toxicity, thymus atrophy, 253
Bleomycin, tallysomycin, lung injury, oxygen toxicity, hyperoxia, 225
Bromofenofos, dephosphate bromofenofos, high-performance liquid chromatography, placental transfer, rat, 299
Broncho-alveolar lavage fluid, cadmium, lung, intratracheal instillation, pulmonary toxicity, 25

Cadmium, cadmium—metallothionein, metallothionein, rats, hepatocytes, 83
Cadmium, choroid plexus, central nervous system, cerebrospinal fluid, 193
Cadmium, lung, intratracheal instillation, pulmonary toxicity, broncho-alveolar lavage fluid, 25
Cadmium, nephrotoxicity, distal tubule, non-invasive enzymatic marker, urinary kallikrein, renin, aldosterone, 117
Cadmium, rats, copper absorption, renal metallothionein, 339
Cadmium—metallothionein, cadmium, metallothionein, rats, hepatocytes, 83
Cadmium chloride, cadmium oxide, lung, intratracheal insillation, pulmonary clearance, essential elements, 15
Cadmium chloride, diethyldithiocarbamate, toxicokinetics, mice, 1
Cadmium oxide, cadmium chloride, lung, intratracheal insillation, pulmonary clearance, essential elements, 15
Carboplatin, cisplatin, mutagenicity, anticancer drugs, 183
Central nervous system, cadmium, choroid plexus, cerebrospinal fluid, 193
Cerebrospinal fluid, cadmium, choroid plexus, central nervous system, 193
Cholangiofibrosis, coumarin, microsomal enzymes, chronic toxicity, rat, 207
Choroid plexus, cadmium, central nervous system, cerebrospinal fluid, 193
Chronic toxicity, coumarin, cholangiofibrosis, microsomal enzymes, rat, 207
Cisplatin, carboplatin, mutagenicity, anticancer drugs, 183
Complex mixtures, benzo[*a*]pyrene, metabolic activation, S9, BAP-7,8-diol, 93
Contact dermatitis, alkytin compounds, organotins, toxicity, bile duct injury, renal toxicity, thymus atrophy, 253
Copper, metallothionein, liver, kidney, detoxification, localization, immunocytochemistry, 307
Copper absorption, cadmium, rats, renal metallothionein, 339
Coumarin, cholangiofibrosis, microsomal enzymes, chronic toxicity, rat, 207
Cytochrome *P*-450, pulegone, hepatotoxicity, destruction, drug metabolizing enzyme, glutamate pyruvate transaminase, 327

Dephosphate bromofenofos, bromofenofos, high-performance liquid chromatography, placental transfer, rat, 299

Destruction, pulegone, cytochrome *P*-450, hepatotoxicity, drug metabolizing enzyme, glutamate pyruvate transaminase, 327
Detoxification, copper, metallothionein, liver, kidney, localization, immunocytochemistry, 307
Dibenzofurans, polychlorinated dibenzo-*p*-dioxins, intravenous dose, selective liver retention, 173
Diethyldithiocarbamate, toxicokinetics, cadmium chloride, mice, 1
Distal tubule, cadmium, nephrotoxicity, noninvasive enzymatic marker, urinary kallikrein, renin, aldosterone, 117
Distribution, ricin, holotoxin, excretion, rat, 161
Dominant lethal, acrylamide, fertilization, implantation, reproduction, sperm, 53
Drug metabolizing enzyme, pulegone, cytochrome *P*-450, hepatotoxicity, destruction, glutamate pyruvate transaminase, 327

Embryolethality, uranium, mice, maternal toxicity, fetotoxicity, teratogenicity, 143
Essential elements, cadmium oxide, cadmium chloride, lung, intratracheal insillation, pulmonary clearance, 15
Excretion, ricin, holotoxin, distribution, rat, 161

Fertilization, acrylamide, implantation, reproduction, sperm, dominant lethal, 53
Fetotoxicity, uranium, mice, maternal toxicity, embryolethality, teratogenicity, 143
Fibrosis, monoclonal antibody, radioimmunoasay, immunohistochemistry, macrophages, 103
Fischer 344 rats, gossypol, pharmacokinetic, B6C3F mice, male reproductive toxicity, male infertility, male contraceptive agent, 37
Free radicals, trichloroethylene, metabolism, lipid peroxidation, influence of hypoxia, nephrotoxicity, 131
Fungal pancreatic enzymes, shock, human neutrophil elastase, proteolysis, protease-inhibitor complexes, 239

Glutamate pyruvate transaminase, pulegone, cytochrome *P*-450, hepatotoxicity, destruction, drug metabolizing enzyme, 327
Glutathione depletion, hydroperoxide toxicity, iron chelator, radical scavenger, glutathione peroxidase, 69
Glutathione peroxidase, hydroperoxide toxicity, glutathione depletion, iron chelator, radical scavenger, 69
Gossypol, pharmacokinetic, Fischer 344 rats, B6C3F mice, male reproductive toxicity, male infertility, male contraceptive agent, 37

Hepatocytes, cadmium, cadmium—metallothionein, metallothionein, rats, 83
Hepatotoxicity, pulegone, cytochrome *P*-450, destruction, drug metabolizing enzyme, glutamate pyruvate transaminase, 327
High-performance liquid chromatography, bromofenofos, dephosphate bromofenofos, placental transfer, rat, 299
Holotoxin, ricin, distribution, excretion, rat, 161
Human neutrophil elastase, shock, fungal pancreatic enzymes, proteolysis, protease-inhibitor complexes, 239
Hydroperoxide toxicity, glutathione depletion, iron chelator, radical scavenger, glutathione peroxidase, 69
Hyperoxia, tallysomycin, bleomycin, lung injury, oxygen toxicity, 225

Immunocytochemistry, copper, metallothionein, liver, kidney, detoxification, localization, 307
Immunohistochemistry, monoclonal antibody, radioimmunoasay, macrophages, fibrosis, 103
Implantation, acrylamide, fertilization, reproduction, sperm, dominant lethal, 53
Influence of hypoxia, trichloroethylene, metabolism, free radicals, lipid peroxidation, nephrotoxicity, 131
Intratracheal instillation, cadmium oxide, cadmium chloride, lung, pulmonary clearance, essential elements, 15
Intratracheal instillation, cadmium, lung, pulmonary toxicity, broncho-alveolar lavage fluid, 25
Intravenous dose, polychlorinated dibenzo-*p*-dioxins, dibenzofurans, selective liver retention, 173
Iron chelator, hydroperoxide toxicity, glutathione depletion, radical scavenger, glutathione peroxidase, 69

Kidney, copper, metallothionein, liver, detoxification, localization, immunocytochemistry, 307

Lipid peroxidation, trichloroethylene, metabolism, free radicals, influence of hypoxia, nephrotoxicity, 131
Liver, copper, metallothionein, kidney, detoxification, localization, immunocytochemistry, 307
Localization, copper, metallothionein, liver, kidney, detoxification, immunocytochemistry, 307
Lung, cadmium, intratracheal instillation, pulmonary toxicity, broncho-alveolar lavage fluid, 25
Lung, cadmium oxide, cadmium chloride, intratracheal instillation, pulmonary clearance, essential elements, 15
Lung injury, tallysomycin, bleomycin, oxygen toxicity, hyperoxia, 225
Lung injury and repair, pulmonary edema, polyamines, ornithine decarboxylase, α-naphthylthiourea, 317

Macrophages, monoclonal antibody, radioimmunoasay, immunohistochemistry, fibrosis, 103
Male contraceptive agent, gossypol, pharmacokinetic, Fischer 344 rats, B6C3F mice, male reproductive toxicity, male infertility, 37
Male infertility, gossypol, pharmacokinetic, Fischer 344 rats, B6C3F mice, male reproductive toxicity, male contraceptive agent, 37
Male reproductive toxicity, gossypol, pharmacokinetic, Fischer 344 rats, B6C3F mice, male infertility, male contraceptive agent, 37
Maternal toxicity, uranium, mice, embryolethality, fetotoxicity, teratogenicity, 143
Metabolic activation, benzo[*a*]pyrene, S9, BAP-7,8-diol, complex mixtures, 93
Metabolism, trichloroethylene, free radicals, lipid peroxidation, influence of hypoxia, nephrotoxicity, 131
Metallothionein, cadmium, cadmium—metallothionein, rats, hepatocytes, 83
Metallothionein, copper, liver, kidney, detoxification, localization, immunocytochemistry, 307
Methylmercury, proximal tubular enzymes, urines, neonatal rat, prenatal exposure, 153
Mice, diethyldithiocarbamate, toxicokinetics, cadmium chloride, 1
Mice, uranium, maternal toxicity, embryolethality, fetotoxicity, teratogenicity, 143
Microsomal enzymes, coumarin, cholangiofibrosis, chronic toxicity, rat, 207
Monoclonal antibody, radioimmunoasay, immunohistochemistry, macrophages, fibrosis, 103
Mutagenicity, cisplatin, carboplatin, anticancer drugs, 183

α-Naphthylthiourea, pulmonary edema, lung injury and repair, polyamines, ornithine decarboxylase, 317
Neonatal rat, proximal tubular enzymes, urines, methylmercury, prenatal exposure, 153
Nephrotoxicity, cadmium, distal tubule, non-invasive enzymatic marker, urinary kallikrein, renin, aldosterone, 117
Nephrotoxicity, trichloroethylene, metabolism, free radicals, lipid peroxidation, influence of hypoxia, 131
Non-invasive enzymatic marker, cadmium, nephrotoxicity, distal tubule, urinary kallikrein, renin, aldosterone, 117

Organotins, alkytin compounds, toxicity, contact dermatitis, bile duct injury, renal toxicity, thymus atrophy, 253
Ornithine decarboxylase, pulmonary edema, lung injury and repair, polyamines, α-naphthylthiourea, 317
Oxygen toxicity, tallysomycin, bleomycin, lung injury, hyperoxia, 225

Pharmacokinetic, gossypol, Fischer 344 rats, B6C3F mice, male reproductive toxicity, male infertility, male contraceptive agent, 37
Placental transfer, bromofenofos, dephosphate bromofenofos, high-performance liquid chromatography, rat, 299
Polyamines, pulmonary edema, lung injury and repair, ornithine decarboxylase, α-naphthylthiourea, 317
Polychlorinated dibenzo-*p*-dioxins, dibenzofurans, intravenous dose, selective liver retention, 173
Prenatal exposure, proximal tubular enzymes, urines, neonatal rat, methylmercury, 153
Protease-inhibitor complexes, shock, fungal pancreatic enzymes, human neutrophil elastase, proteolysis, 239
Proteolysis, shock, fungal pancreatic enzymes, human neutrophil elastase, protease-inhibitor complexes, 239

Proximal tubular enzymes, urines, neonatal rat, methylmercury, prenatal exposure, 153
Pulegone, cytochrome *P*-450, hepatotoxicity, destruction, drug metabolizing enzyme, glutamate pyruvate transaminase, 327
Pulmonary clearance, cadmium oxide, cadmium chloride, lung, intratracheal insillation, essential elements, 15
Pulmonary edema, lung injury and repair, polyamines, ornithine decarboxylase, α-naphthylthiourea, 317
Pulmonary toxicity, cadmium, lung, intratracheal instillation, broncho-alveolar lavage fluid, 25

Radical scavenger, hydroperoxide toxicity, glutathione depletion, iron chelator, glutathione peroxidase, 69
Radioimmunoasay, monoclonal antibody, immunohistochemistry, macrophages, fibrosis, 103
Rat, bromofenofos, dephosphate bromofenofos, high-performance liquid chromatography, placental transfer, 299
Rat, coumarin, cholangiofibrosis, microsomal enzymes, chronic toxicity, 207
Rat, ricin, holotoxin, distribution, excretion, 161
Rats, cadmium, cadmium—metallothionein, metallothionein, hepatocytes, 83
Rats, cadmium, copper absorption, renal metallothionein, 339
Renal metallothionein, cadmium, rats, copper absorption, 339
Renal toxicity, alkytin compounds, organotins, toxicity, contact dermatitis, bile duct injury, thymus atrophy, 253
Renin, cadmium, nephrotoxicity, distal tubule, non-invasive enzymatic marker, urinary kallikrein, aldosterone, 117
Reproduction, acrylamide, fertilization, implantation, sperm, dominant lethal, 53
Ricin, holotoxin, distribution, excretion, rat, 161

S9, benzo[a]pyrene, metabolic activation, BAP-7,8-diol, complex mixtures, 93
Selective liver retention, polychlorinated dibenzo-*p*-dioxins, dibenzofurans, intravenous dose, 173
Shock, fungal pancreatic enzymes, human neutrophil elastase, proteolysis, protease-inhibitor complexes, 239
Sperm, acrylamide, fertilization, implantation, reproduction, dominant lethal, 53

Tallysomycin, bleomycin, lung injury, oxygen toxicity, hyperoxia, 225
Teratogenicity, uranium, mice, maternal toxicity, embryolethality, fetotoxicity, 143
Thymus atrophy, alkytin compounds, organotins, toxicity, contact dermatitis, bile duct injury, renal toxicity, 253
Toxicity, alkytin compounds, organotins, contact dermatitis, bile duct injury, renal toxicity, thymus atrophy, 253
Toxicokinetics, diethyldithiocarbamate, cadmium chloride, mice, 1
Trichloroethylene, metabolism, free radicals, lipid peroxidation, influence of hypoxia, nephrotoxicity, 131

Uranium, mice, maternal toxicity, embryolethality, fetotoxicity, teratogenicity, 143
Urinary kallikrein, cadmium, nephrotoxicity, distal tubule, non-invasive enzymatic marker, renin, aldosterone, 117
Urines, proximal tubular enzymes, neonatal rat, methylmercury, prenatal exposure, 153

Toxicology, 55 (1989) 361–362

TOXICOLOGY

VOLUME CONTENTS

Volume 55 (1989)

Effects of diethyldithiocarbamate on the toxicokinetics of cadmium chloride in mice **(Complex formation with DDC leads to complex changes in cadmium distribution and has no antidote effects)**
by O. Andersen and J.B. Nielson (Odense, Denmark) 1–14

Toxicity of cadmium oxide instilled into the rat lung. I. Metabolism of cadmium oxide in the lung and its effects on essential elements **(The pulmonary clearance profile for Cd depends upon initial lung burden and not on the chemical form)**
by S. Hirano, N. Tsukamoto, E. Kobayashi and K.T. Suzuki (Ibaraki, Japan) 15–24

Toxicity of cadmium oxide instilled into the rat lung. II. Inflammatory responses in broncho-alveolar lavage fluid **(No-effect levels of intratrachealy instilled cadmium appear to be 2 μg per rat)**
by S. Hirano, N. Tsukamoto, S. Higo and K.T. Suzuki (Ibaraki, Japan) 25–35

Interspecies comparison of pharmacokinetic profile and bioavailability of (±)-gossypol in male Fischer-344 rats and male B6C3F mice **(Differin pharmacokinetic profiles may explain the differential sensitivity of mice and rats to the contraceptive and toxic effects of gossypol)**
by M.B. Abou-Donia, M.A. Othman and P. Obih (Durham, NC) 37–51

Factors associated with reduced fertility and implantation rates in female mated to acrylamide-treated rats **(Acrylamide treatment reduced fertility and increased pre- and post-implantation losses)**
by V.H. Sublet, H. Zenick and M.K. Smith (Cincinnati, OH and Washington DC, ... 53–67

Cytotoxicity of an organic hydroperoxide and cellular antioxidant defense system against hydroperoxides in cultured mammalian cells **(Cytotoxicity of t-BHP is induced by an iron-dependent and radical mediated mechanism)**
by T. Ochi and S. Miyaura (Kanagawa, Japan) 69–82

Comparisons of the toxicity of $CdCl_2$ and Cd–metallothionein in isolated rat hepatocytes **(Primary cultures of rat hepatocytes mimic in vivo $CdCl_2$ and CdMT toxicity)**
by L.E. Sendelbach, W.M. Bracken and C.D. Klaassen (Kansas City, KS) 83–91

Inhibition of benzo[*a*]pyrene-7,8-diol formation in vitro by complex organic mixtures **(The in vivo observed inhibition of benzo[*a*]pyrene-induced tumor initiation by coal-derived complex organic mixtures may be due to a reduced rate of carcinogen metabolism)**
by D.A. Dankovic, B.L. Thomas, R.C. Zangar, D.W. Later and D.L. Springer (Richland, WA and Salt Lake City, UT) 93–102

A new monoclonal antibody to study mouse macrophage antigen during BHT-induced lung injury and repair **(A particular antibody reognizes a 100 kDa protein associated with lung damage by BHT and oxygen)**
by S.J. Kennel, T. Lankford, P. Galloway and H.P. Witschi (Oak Ridge, TN) 103–116

Renal kallikrein excretion as a distal nephrotoxicity marker during cadmium exposure in rats **(Chronic cadmium administration leads to complex changes in some distal tubular functions)**
by J.P. Girolami, J.L. Bascands, C. Pécher, G. Cabos, J.P. Moatti, J.F.Mercier, J.M. Haguenoer and Y. Manuel (Toulouse and Lille, France) 117–129

Lipid peroxidation: A possible mechanism of trichloroethylene-induced nephrotoxicity **(Under hypoxic conditions lipid peroxidation is involved in the mediation of toxic action)**
by C. Cojocel, W. Beuter, W. Müller and D. Mayer (Frankfurt, FRG) 131–141

The developmental toxicity of uranium in mice **(Eleven oral doses of uranium during the gestation lead to fetal damage which may be dose dependent)**
by J.L. Domingo, J.L. Paternain, J.M. Llobet and J. Corbella (Barcelona, Spain) 143–152

Effects of prenatal methylmercury exposure on urinary proximal tubular enzyme excretion in neonatal rats **(Prenatal methylmercury has little effect on postnatal renal function)**
by A.M. Saillenfait, M.T. Brondeau, D. Zissu and J. De Ceaurriz (Vandoeuvre, France) 153–160
The toxicity, distribution and excretion of ricin holotoxin in rats **(The toxicokinetics of the plant protein are described)**
by C.S. Ramsden, M.T. Drayson and E.B. Bell (Manchester, UK) 161–171
Selective retention of toxic polychlorinated dibenzo-*p*-dioxins and dibenzofurans in the liver of the rat after intravenous administration of a mixture **(The complex toxicokinetics of about a dozen members of this group of chemicals in the liver is described)**
by M. van den Berg, J. van Wijnen, H. Wever and W. Seinen (Utrecht, The Netherlands) 173–182
Mutagenicity of cisplatin and carboplatin used alone and in combination with four other anticancer drugs **(Susceptibility of different bacterial strains in the Ames test to platinum compounds are not affected by combination with other carcinostatic drugs)**
by M.A. Hannan, A.A. Al-Dakan, S.S. Hussain and M.H. Amer (Riyadh, Saudi Arabia) 183–191
The choroid plexus as a target site for cadmium toxicity following chronic exposure in the adult mouse: an ultrastructural study **(100 ppm cadmium in drinking water cause degenerative changes in the chloroid plexus)**
by A.A. Valois and W.S. Webster (Sydney, Australia) 193–205
Studies on the induction of cholangiofibrosis by coumarin in the rat **(An extensive account of the effects of coumarin on the liver)**
by J.G. Evans, E.C. Appleby, B.G. Lake and D.M. Conning (Surrey and London, UK) 207–224
Exacerbation of tallysomycin toxicity in rats by concurrent exposure to sublethal hyperoxia **(Diffuse interstitial lung lesions and vascular damage produced by tallysomycin is enhanced by hyperoxia)**
by D.B. Coursin, H.P. Cihla and T.D. Oberley (Madison, WI) 225–237
A unique case of intravenous injection of fungal "pancreatic" enzymes causing shock and proteolysis of haemostatic proteins **(Intravenous injection of hydrolytic pancreatic enzymes causes severe disturbance of blood coagulation and elastase release)**
by R. Seitz, G. Adler, I. Koop, H. Koop and R. Egbring (Marburg, FRG) 239–246
Book reviews 247–250

Review Paper
Toxicity of dibutyltin, tributyltin and other organotin compounds to humans and to experimental animals
by I.J. Boyer (Washington, DC) 253–298

Research Papers
Plasma concentration and placental transfer of bromofenofos in rats **(Bromofenofos is rapidly hydrolyzed and circulates as dephosphate bromofenofos in the plasma with a half-life of approximately 24 h)**
by H. Yoshimura and Y.S. Endoh (Tokyo, Japan) 299–306
Metallothionein immunoreactivity in the liver and kidney of copper injected rats **(Copper induces metallothionein in liver, kidneys and plasma but not in erythrocytes)**
by L.M. Williams, H. Cunningham, A. Ghaffar, G.I. Riddoch and I. Bremner (Aberdeen, UK) 307–316
Polyamine synthesis in rat lungs injured with alpha-naphthylthiourea **(ANTU-induced lung edema in rats is not mediated by an increase in lung polyamines)**
by J.W. Olson, S.A. Gebb, U. Orlinska and M.N. Gillespie (Lexington, KY) 317–326
Hepatotoxicity of pulegone in rats: Its effects on microsomal enzymes, in vivo **(An oxidative metabolite seems to decrease cytochrome *P*-450 and to cause liver damage)**
by B. Moorthy, P. Madyastha and K.M. Madyastha (Bangalore, India) 327–337
Renal binding of cadmium in the rat following intragastric exposure **(Enteral cadmium interferes with copper absorption and reduces renal copper)**
by J.A. Szymańska, E.M. Bem, J.K. Piotrowski, S. Brzeźnicki and T. Baran (Łodz, Poland) 339–348
Erratum 349–351
